Fairness, Accountability of AI

Emilia Gómez, Virginia Dignum

Academic coordinators

@emiliagogu, @vdignum #HUMAINT

Joint Research Centre

- EC's science and knowledge service
- Support EU policies with independent research evidence throughout the whole policy cycle.

JRC sites

Headquarters in Brussels
and research facilities located
in **5 Member States:**

- Belgium (Geel)
- Germany (Karlsruhe)
- Italy (Ispra)
- The Netherlands (Petten)
- **Spain (Seville)**

RESPONSIBLE AI

We don't do *just* AI.

UMEÅ UNIVERSITY

WHAT WE DO

- We are not ethicists! We do not argue on what is *right* or *wrong*.
- **We work in the development of methods, formalisms, and tools** to understand and mitigate the effects of intelligent systems have into us and our societies.
- We consult of policymakers; e.g. *European Commission, IEEE SA, ISO, UK's APPG*.

Artificial Intelligence for Europe

COM(2018)237

25.04.2018

Being ahead of technological developments and encouraging uptake by the public and private sectors

Prepare for socio-economic changes brought by AI

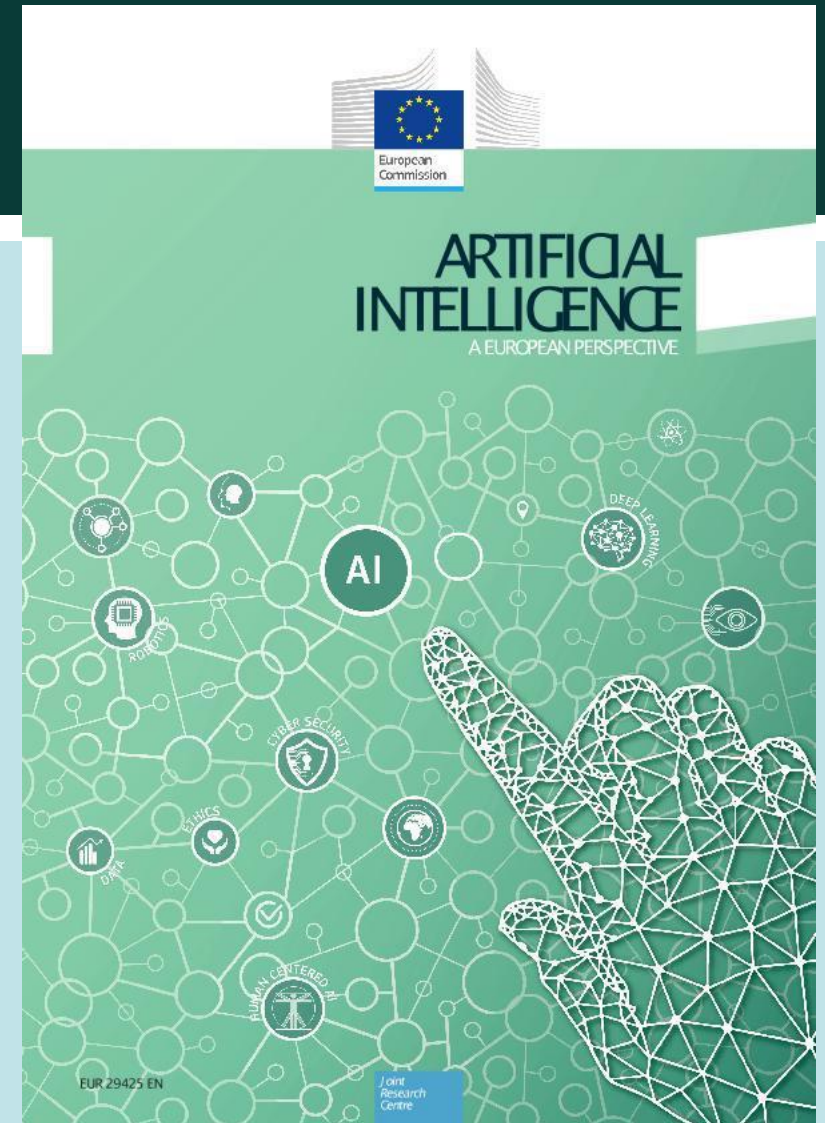

Ensure an appropriate ethical and legal framework

Coordinated plan

One of the 6 priorities of the new commission

Artificial Intelligence @ JRC

- Transversal project: community of practice, policy support.
- Report
 - About AI
 - EU in the global landscape
 - AI in the EU
 - Ethical and societal perspective
 - Legal perspective
 - Educational perspective
 - Economic perspective
 - Cybersecurity perspective
 - Energy perspective
 - Data perspective
 - Societal resilience perspective

Artificial Intelligence: A European Perspective. Joint Research Centre, 2018.

Topics

AI for the public sector

AI-enabled solutions can deliver shorter and richer feedback loops for all levels of governance, providing an opportunity to speed up, improve the efficiency and effectiveness of service delivery.

AI Landscape and indicators

AI is experiencing a rapid pace of progress, due to several key enablers: faster processing speeds, large amounts of data, and advanced algorithms. Still lacking official methodologies have been applied to analyse the AI ecosystem and track its

Data: a cornerstone for AI – Toward a Common European Data Space

sources in order to fulfil its functions. With its actions, the EC seeks to support wider

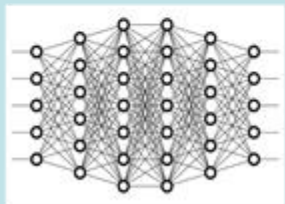

It will monitor industrial, technological and research capacity, policy initiatives, uptake, technical developments and socio-economic impact.
